SUBJECT No 342

Improvement of Seringapatam and Ganjam

Messrs B Narasinga Rao Seringapatam Municipality Veene Rangasami Iyengar and K Krishnachar Seringapatam taluk

Summary of discussion —The sanitary improvement of these places of historical importance is being urged for the consideration of Government for many years As suggested last year, the Government were pleased to depute the Chief Engineer and the Deputy Commissioner of Mysore to inspect the towns and submit suggestions for their improvements The said officers accordingly made a detailed inspection of the towns The memorandum submitted to Government by the Chief Engineer was lately placed before the Municipal Council for consideration The first stage of the improvement consits in supplying water and closing old *Karanjes* The initial cost of these works is estimated Rs 75 000 The present state of the financial condition of the Municipality is such as is barely sufficient to meet the ordinary demands and it is impossible to meet any portion of the initial outlay Even if the initial outlay is met by Government, it is not possible to meet the maintenance charges with the present and prospective Municipal Revenues unless they are substantially supplemented by other sources Taking into consideration the importance of the towns from every point of view and their long neglected condition it is respectfully prayed—

(1) that the initial cost of water supply scheme may be kindly borne by Government

(2) that the land revenue derived within the Municipal limits may be kindly granted to the Municipality as it is the wet lands which have contributed to the unhealthiness of the towns

Reply of Government —Noted
